

O'Sullivan Creel, LLP & Waldorff Insurance & Bonding present  
4TH ANNUAL CONSTRUCTION SEMINAR

# SURETY BONDING AND CONSTRUCTION RISK MANAGEMENT

## ABOUT THE SEMINAR

You spoke, and we listened. Past participants overwhelmingly chose risk management as the number one topic they wanted to know more about. Based on your feedback, we've gathered national underwriters and local brokers in one place to discuss the key risk management issues affecting the construction industry today. Plus, we'll look at the latest trends and forecasts of our local economy.

The competitive environment has depressed construction company margins to the point where there is absolutely no room for error. **Now is the time** to assure that you know the coverages and programs you can (and cannot) trim to control costs.

**Now is the time** to assure that your insurance programs are rock solid.

And **now is the time** to develop or enhance your relationships with the leading underwriters or best brokers to be positioned for the changes ahead.

Join us as risk management, insurance and other industry professionals share their thoughts on topics including:

- Surety update
- Risk management
- Q&A session on insurance and claims
- Local economic update
- Tax and accounting update

Speakers will share views of the current local environment, and also offer practical advice on risk management topics so you can manage your business better. This year's seminar is a must for owners, presidents, project managers, and finance managers of construction companies.
