

## Gulf Coast State College

Serving the community since 1957, Gulf Coast Community College provides a first class education to the citizens of Bay, Gulf and Franklin counties. GCSC is proud of the success of its graduates who transfer to state universities, and of its occupational students who have extremely high placement rates in the careers they have chosen.

GCSC faculty and staff serve students who plan to transfer to a state university, want a new career or better job skills, seek basic skills, or want to enrich their lives. GCSC has an annual enrollment of over 22,000 students in credit courses, non-credit courses, workforce and continuing education classes. Students may earn an Associate of Arts degree in

one of 74 pre-baccalaureate programs or choose from one of over 50 workforce education degrees and certificates. With the addition of the College's first 4-year degree (the new Bachelor's Degree in Technology Management), students can take the next step into a high-wage, high-skill career in a growing industry within Northwest Florida.

In addition to the Panama City Campus, the college offers classes at Tyndall Air Force Base, the North Bay Center in Southport, and the Gulf/Franklin Center in Port St. Joe. Recognizing that flexible

scheduling is important, Gulf Coast offers "College Your Way" for students who wish to take online classes, short 8-week semester classes, or even Friday-only classes. For more information visit [www.gulfcoast.edu](http://www.gulfcoast.edu) or call (850) 769-1551.
